OBJECTIVE

Versatile Full Stack Developer with 2+ years of experience building web applications and AZ-900 certification in Microsoft Azure. Combining technical proficiency in front-end (React, Next and JavaScript) and back-end (Node.js, MongoDB, SQL) with strong problem-solving and communication skills, I seek to deliver scalable, cloud-integrated solutions in Azure or Full-Stack development roles.

SKILLS

Front-End	HTML, CSS, Tailwind, ReactJS, Javascript, Typescript
Back-end	NodeJS, ExpressJS, Socket.IO, Python
Frameworks	NextJS, Flask, Bubble.IO
DevOps/Cloud	Microsoft Azure (VM, Functions, WebApps), AWS (Lambda, API Gateway), Docker
Database	SQL, Prisma, MongoDB

CERTIFICATIONS

Microsoft Azure Fundamentals AZ-900   August 2024
Score: 857

The Complete 2022 Web Development Bootcamp   April 2021 - March 2022
Udemy: Dr. Angela Yu

EXPERIENCE

Full-Stack Engineer   Nov 2024 - Present
Anima People   *London, UK*

- Spearheading the design and development of PsycSec's MVP, leveraging the combined strengths of Next.js, Node.js, Prisma, PostgreSQL, and Tailwind CSS to build a scalable, maintainable, and efficient application. Currently driving iterative improvements and feature enhancements, ensuring alignment with core product requirements and facilitating rapid feedback incorporation from stakeholders and users.

- Developed a role-based access control (RBAC) user dashboard utilising MFA, reducing unauthorised access incidents by 30% and enabling tailored access for key user roles. This improved operational efficiency, saving approximately 15% of support time previously spent on access and authentication issues.

- Connected and integrated APIs between front-end and back-end services and collaborating with the Data Science team to successfully deploy machine learning models by using AWS Gateway and Lambda. This real-time integration streamlined predictive analytics, reducing data processing time by 25% and supporting improved decision-making within the platform.

- Liaised with key stakeholders and investors during product demonstrations, effectively gathering feedback and aligning product functionality with business objectives, resulting in actionable improvements for further development.

- Managed version control through Git and coordinated with QA teams to maintain code integrity and stability, reducing deployment errors by 35% and ensuring faster bug resolution cycles, resulting in smoother production releases and increased development velocity.

Administrator   Nov 2023 - Nov 2024
Kings College Hospital NHS Trust   *London, UK*

- Organized and managed a comprehensive filing system that improved the efficiency of daily operations by 50%.
- Devised an automated file for registering life-cycle of reports from generation to postage into laboratories across London hospitals reducing error of incorrect posts by 70%.
- Developed and maintained an up-to-date database of contacts, ensuring accurate and timely communication.

Full-Stack Developer   Mar 2023 - Nov 2023
Freelance   *London, UK*

- Developing, optimising and maintaining the websites and applications utilising HTML, CSS, SQL. JavaScript, React and various APIs to meet my clients needs and goals.
- Coding design mock ups into pixel perfect, cross browser compatible, search engine friendly websites.
- Responsible from concept to completion while managing outside vendors, diagnosing, troubleshooting and resolving the issues with website, server and/or third-party integration.

Full-Stack Developer   Mar 2022 - Jun 2022
3W Creators LLP   *London (Remote)*

- Developed a content management system for a media company that reduced maintenance costs by 20%
- Completed 3 full web front ends using HTML, CSS, JS, Node, Express, React and SQL.
- Responsible from concept to completion while managing outside vendors, diagnosing, troubleshooting and resolving the issues with website, server and/or third-party integration.

Head of Sales   May 2018 - Mar 2022
Gujarat University   *Ahmedabad, India*

- To assist and counsel the students regarding their post graduation academics and future learning routes such as Cyber Security.
- To connect, arrange interviews and manage placements for the students and conducted over 50 workshops with 85% employment turnover rate.
- Researched and presented upcoming technologies to board members for inclusion in courses that increased course enlisting by 60%.

PROJECTS

Recipe Diary This is a RESTful web-app providing recipe management for users. With CRUD endpoints to recipes, along with user authentication and personalised dashboard, managing your favourite recipes in one place has made it more convenient. [(Repo Link)](#)

SayIt A content management system created to act as a forum for anonymous users to express their thoughts. The functionality had likes, react via emoticons and comment features such that users can interact with posts. [(Repo Link)](#)

Voyage A website created from my hobby of travelling. This is my current running project encompassing user registration, wish-list destinations on dashboard and search ability for locations with a response of key facts and things-to-do. [(Repo Link)](#)

EDUCATION

Software Developer Bootcamp, La Fosse Academy   July 2022 - September 2022
A 3-month intensive taught course covering HTML, CSS, JavaScript, React and Python with databases such as MongoDB and PostgreSQL alongside 7 hands-on industry projects with Agile Methodology using Trello

Bachelor of Science in Hospitality Management, MS Univeristy, Vadodara, India   2011 - 2014
